BERNARDO OLIVEIRA

IT Support / Help Desk | Cybersecurity | Full Stack Developer | Embedded Systems

Feira de Santana, BA, Brazil • (75) 9882-2973 • bernadoxd@gmail.com
Portfolio: bernardoliveira88.vercel.app • **GitHub:** github.com/Bernardoliveira88 • **LinkedIn:** linkedin.com/in/bernardoliveira88

PROFESSIONAL PROFILE

Computer Engineering student (UNIFAN) with a full stack profile, focused on building software for real-world problems: from APIs, databases and AI integration to responsive web interfaces. Combines a technical foundation in C/C++, JavaScript/TypeScript and Node.js with hardware and digital logic fundamentals, plus hands-on experience in customer service, sales and tech event support. In hackathons and challenges, bridges technology and business: problem validation with customers, partner research, value proposition and pitching. Career goal in cybersecurity, open to opportunities in IT support, software development and embedded systems.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, PHP, HTML5, CSS3 • Python (currently learning)

Back-End & APIs: Node.js, Fastify, REST APIs, JWT, Zod, asynchronous processing (BullMQ/Redis)

Front-End: React, Next.js, Tailwind CSS, shadcn/ui, PWA, responsive design, Figma

Data & AI: PostgreSQL, Prisma, pgvector (semantic search), Redis, Google Gemini / LLM integration

DevOps & Tools: Git & GitHub, Docker & Docker Compose, Vercel, Linux, Vitest

Security (fundamentals): JWT authentication, role-based access control (RBAC), input validation, secrets and environment variable protection

Support & Hardware: end-user support and guidance, troubleshooting, digital logic and 74HC ICs, breadboard prototyping, Tinkercad, embedded systems

Spoken Languages: Portuguese (native) • English (advanced)

PROJECTS

Seamoney — Cross-Border Payments for Importers

Oct 2026 • Team

Colosseum's Crypto World's Fair 2026 international hackathon

- Working prototype for Brazilian small and mid-sized importers to manage supplier invoices, estimate payment costs and reconcile stablecoin payments (Tempo and Solana testnets), with AI-assisted invoice reading, supplier receipts and CSV reports.
- **Led the business and market workstream:** problem validation with potential customers, partner research, value proposition, pitch and demo video.

Stack: *Next.js, TypeScript, Java 21 / Spring Boot, PostgreSQL, Python / FastAPI, Docker, blockchain (testnet)*

Proximity — Public Service Access Platform

Oct 2026 • Solo

NAUFest Challenge #AIForImpact (Junior Achievement Americas × HP) • Live demo

- Web platform connecting citizens to clear guidance on public services, focused on small municipalities and remote communities in Bahia, prioritizing official sources and flagging data that still needs confirmation.
- Owned the full cycle: development, business case and presentation. Rule-based search engine with text normalization and ambiguity detection, automated tests and an architecture ready for generative AI.

Stack: *React, TanStack Start, TypeScript, Tailwind CSS, Vitest, Google Gemini*

HealthTech (RoundLog) — Clinical Management Platform

2026 • Team (university)

- Hospital clinical management system: medical rounds, patient records, nursing workflows, shift handoffs, a family portal and operational analytics. Back-end with JWT authentication, PostgreSQL/Prisma, BullMQ/Redis queues and AI audio summaries (Google Gemini); web front-end and a bedside PWA.
- **Front-end contributions:** login error handling (distinguishing API connection failures from invalid credentials), build and lint fixes for deployment, scripts to run the web and PWA apps together, and run/deploy documentation.

Stack: *Node.js, TypeScript, Fastify, Prisma, PostgreSQL, Redis, BullMQ, JWT, Docker, Gemini, Next.js, React Query, Zustand*

Gracon (NexusDoc) — Intelligent Contract Management

2026 • Team (university)

- MVP that ingests PDF contracts, extracts structured data with AI and provides semantic search and versioning, with authenticated workspaces, role-based access and automated expiry alerts by email. Web dashboard built with Next.js.
- **Role:** university team project, contributing to product conception and the business workstream.

Stack: *Node.js, TypeScript, Fastify, Prisma, PostgreSQL + pgvector, Gemini, Zod, Resend, Vitest, Docker, Next.js*

Personal Portfolio — Responsive website

Oct 2026 • Solo

bernardoliveira88.vercel.app

- Static website built with plain HTML, CSS and JavaScript, no frameworks: responsive layout, mobile menu, active navigation, project filters and case-study modals; deployed on Vercel.

Stack: *HTML5, CSS3, JavaScript, Vercel*

Logic-Gate Voting System — Digital circuit prototype

2026 • Academic

- Designed and wired a breadboard voting system in Tinkercad using a DIP switch, 74HC08 (AND) and 74HC32 (OR) ICs and a result LED, including diagnosing and fixing short circuits in the IC wiring.

Stack: *Digital logic, 74HC ICs, Tinkercad*

PROFESSIONAL EXPERIENCE & TECH COMMUNITY

Sales Representative — Multimarcas Consórcios

Mar – Jun 2026

- Handled customer service and negotiation in a target-driven environment, focused on customer needs and results.
- Supported lead generation through paid traffic and social media.
- Contributed to automating repetitive processes, improving the organization and efficiency of customer interactions.

Event Monitor — Reprograme-se (UNIFAN)

Sep 2026 • 15+ h

- Handled attendee check-in and guidance and provided direct support to speakers and organizers throughout the event.

Event Monitor — Esquenta DevOpsDay Feira de Santana

Aug 2026 • 15+ h

- Managed attendee reception and check-in, supported organizers and speakers and quickly resolved attendee requests at a local tech community event.

EDUCATION

UNIFAN — Bachelor of Computer Engineering

Feb 2026 – 2029 (expected)

Currently in the 2nd semester. Highlighted coursework: Theory of Computation (automata, grammars, Chomsky hierarchy), C/C++ programming and digital logic.

ACHIEVEMENTS & CERTIFICATIONS

- **Arena Universitária — 3rd place nationally** (Sep 2026) and 1st place at state level. 40-hour program in leadership, teamwork, critical thinking and decision-making.
- **NAUFest #AIForImpact (Junior Achievement Americas × HP)** — Challenge completed (Oct 2026) with an AI-based solution for a real-world problem (Proximity).
- **Colosseum's Crypto World's Fair 2026** — international hackathon participant with the Seamoney project (Oct 2026).
- **Nestlé Campus Challenge 2026** — team participant (in progress), developing a product activation and student engagement proposal.

SOFT SKILLS

Communication • Negotiation • Business Acumen • Teamwork • Customer Service • Self-directed Learning • Emotional Intelligence • Performance Under Pressure
